

# Summer Camps

Explore our unique majors with these fun, interactive, and hands-on summer camps.

## Business for the 21st Century Career Camp

June 16 & 17  
Students Entering Grades 9-12

Discover what management and marketing careers look like in the 21st Century. Digital media is becoming a significant marketing tool, and careers

in digital marketing are growing along with those in the sports and/or event environments. Our faculty will introduce you to marketing careers in the digital world and the exciting opportunities in the sports and events management field. Join us for two days as our passionate faculty get you excited about what the future in business and marketing may hold for you.

## Designing a Digital Future Camp

June 16 & 17  
Students Entering Grades 10-12

Do you love computers? If yes, this two-day, overnight camp is for you! Explore a variety of digital media-based fields including gaming, web design,

product design, mobile applications, and graphic designs. Students will have the opportunity to immerse themselves in our labs and classrooms and participate in gaming, simulation activities, and web development workshops. Hands-on workshops will guide students to develop their own games and mobile apps.

## Future Restaurateurs Career Camp

June 17 & 18  
Students Entering Grades 9-12

Do you love to cook or bake? Do you dream of owning your own restaurant or becoming a famous chef? Join chefs from Penn College's hospitality

department for this two-day, overnight camp focused on the ins and outs of becoming a chef. Students will experience hands-on activities centered around menu planning, cooking, baking, and more!

## Health Careers Camp

June 17 & 18  
Students Entering Grades 9-12

Do you love helping people? Have you ever thought about a career in the health care industry? If you answered yes, then learn more about this exciting health

careers camp presented by Penn College and Susquehanna Health. This two-day, overnight camp introduces students to a variety of health careers including nursing, physician assistant, dental hygiene, radiography, emergency medical services, and more! Students will participate in hands-on activities and tour the region's new state-of-the-art hospital.

## SMART Girls Summer Camp\*

Manufacturing Your Future:  
It's a 3D Summer in Careers  
Never Imagined

June 22 – 25  
Students Entering Grades 9-11

Penn College developed Science and Math Applications in Real-World Technologies (SMART) Girls to counter an alarming academic and social trend: Girls tend to shy away from math and sciences as they enter adolescence and their important high school years. SMART Girls provides young females the opportunity to experience math and science as a foundation for careers in technology.

This year's camp will engage participants in the art of 3D printing. Manufacturing Your Future will give each girl an opportunity to experience the art of 3D printing from beginning to end. Participants will work in teams to design and print, and ultimately showcase and market, their creations within a Shark Tank atmosphere. Students need no prior knowledge of 3D printing or design – just a willingness to work together in a team, learn new technology, and have a great time!

\*The cost of this camp is kept to a nominal fee thanks to the Education Improvement Tax Credit Program.

## Creativity Art Camp

June 22 – 26  
(Day Camp Only)  
Students Entering Grades 4-6

This camp provides kids the chance to explore art and creativity through a variety of art media. Students will work with professional artists to produce unique works of art, focus on the creative process, and develop imagination and creativity. Activities include creating a miniature fantasy clay structure, exploring the basics of Photoshop, and learning the art and development process for making a short book. All art supplies are included.

## Youth Training for Athletic Development Camp

June 22 – July 15  
(Day Camp Only)  
Two sections: Students Entering Grades 7-9 and Grades 10-12

Are you a young athlete looking to learn how to train smarter? Are you ready to combine proper strength conditioning techniques, nutrition education, and functional sport application for optimal performance? This day camp is specific to youth training based on the National Strength and Conditioning Association (NCSA) guidelines and is taught by exercise science faculty. Training sessions will emphasize injury prevention and agility/speed progression.
